

HIV AND CORRECTIONS MARYLAND, 2018

OCTOBER 2019

New HIV Diagnoses in Maryland

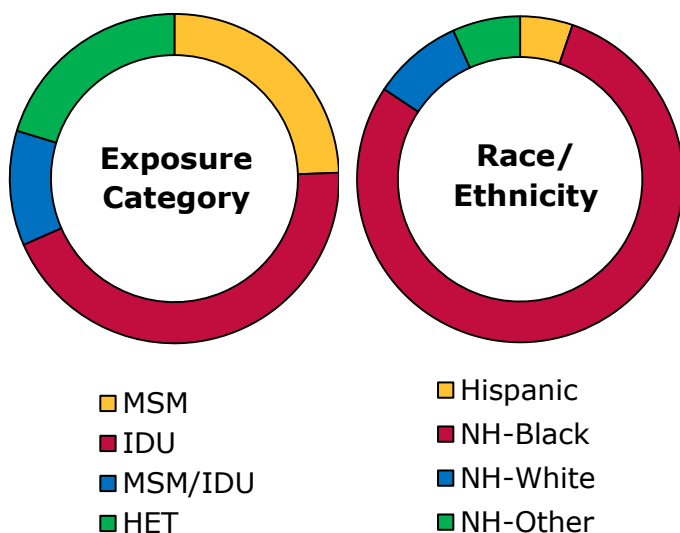

In 2018, there were 18 reported HIV diagnoses in Maryland correctional facilities.

- Of the 994 reported HIV diagnoses during 2018, 1.8% were residents of Maryland correctional facilities at the time of their diagnosis.
- In the last 10 years, the total number of reported HIV diagnoses in state correctional facilities peaked at 66 in 2010 and decreased to 18 in 2018.

Characteristics of People in Correctional Facilities Living with HIV

At the end of 2018, an estimated 226 people living with diagnosed HIV were residents of state correctional facilities.

- Of the 31,559 living with diagnosed HIV infection, 3.6% were residents of a Maryland correctional facility at diagnosis. At the end of 2018, 0.7% were residents of a Maryland correctional facility.
- 722 (60.4%) of the 1,195 total people living with diagnosed HIV among residents of state or federal correctional facilities at the time of their HIV diagnosis have been diagnosed with AIDS.
- Of the 226 people that were residents of a state correctional facility at end of 2018, 161 had a viral load test result reported in 2018. Of those with a reported test result, 87.0% had a suppressed viral load.
